Exception Rules to BPHS

By

Manish Agarwal, India

Edited By: Vinayak Bhatt

This article is based on Jataka Mani Manjusa written by Challa Soma Sundaram which in turn based on Jataka Narayaneeyam. Basically this deals with the exception rule to generally known rule of BPHS and they are bit advance in nature. I am reproducing some rule from the book for the benefit of readers.

- We will consider Jupiter, Venus as naturally good planet, we will consider mercury as naturally good planet if it is in association of benefic planets or alone otherwise malefic planet. We will consider moon as benefic planet from Sudha panchami to Bahula Ekadashi. Jupiter has 100% subhatwa (Benefic), Venus 75% and alone mercury has 50%. Planet attains Shubhatwa dosha

(kendrahapatya dosha) equivalent to their Shubhatwa.

- Sun, Mars, Saturn, Rahu and Ketu are naturally bad planet. Saturn is 100% malefic, Mars is 75% and Sun is 50% only. Planets attains shubhatwa for being Kendra lord equivalent to their values in papatwa
- Planets in combination of sun is said to be in Astangatwa. Astangatwa is last 30 Ghatikas of Bahula chaturdashi, Amavasya and 30 Ghatikas of Sudha Padyami of the moon.
- If a planet joins the moon, it is known as samagamana; this results in greater power to the planet.
- If a planet (except sun) joins mars, there will be fight between mars and other planet
- Author has revealed a secrete achhdhana dristi. As per the author, Full moon, Jupiter, Saturn and Ketu have achhdhana power on 2nd and 12th houses. Jupiter with naturally bad planets will have achhdhana on 12th house only.

Naturally Good Planets are good if they are lord of Kona (Trikon) house and bad by the virtue of lordship of Kendra houses. If naturally good planet is lord of both Kendra and kona it will give mix result and will be counted as good planet only. For example if Venus is lord of kendra and sitting in Kendra, it will give very bad results. If it is sitting in Kona, it will give good results and it is stronger in 5th house. It will give Dhana yoga in 2nd house and great yoga in 3rd, 6th, 8th, 11th and 12th houses if it is lord of Kendra house

Summary result for benefic planets:

1. Naturally good planets having kendradhipatya (lordship of 1,4,7 and 10) give good yoga when placed in bad houses (3,6,8 and 12).
2. Naturally good planets having lordship of bad houses (3,6,8 and 12) give good yoga only when positioned in Kendra houses (1,4,7 and 10). Yoga in point one is better than yoga mentioned here in point 2.

3. Naturally good planets having kendradhipatya (lordship of 1,4,7 and 10) and remain in Kendra position give bad yoga
4. Naturally good planets having lordship of bad houses (3,6,8 and 12) and remain in kona (5 and 9) position give bad yoga

Naturally bad planets are good if they are lord of Kendra and bad if they are lord of Kona. If naturally bad planets have both lordship of Kendras and Kona, they become more malefic planets. However, following rules must be considered before taking a final call and they will give some good results also, by the virtue of lordship of Kendra house

- If naturally bad planet has lordship of Kendra first and kona next, it will behave more as a malefic
- If naturally bad planet has lordship of Kona first and Kendra next it will behave more as a benefic
- A malefic planet gives bad results, when it is in kona position

Summary result for malefic planets:

1. If naturally malefic planet has the lordship of Kendra first and kona next (or Konadhipatya dosha), it will give good results if it is sitting in 3rd, 6th, 8th or 12th house or in 2nd or 11th house.
2. Naturally malefic planet having lordship of bad houses (3,6,8 and 12) give good yoga only when positioned in kona (5 and 9)
3. Naturally malefic planets having kendradhipatya (lordship of 1,4,7 and 10) and remain in Kendra gives good yoga
